

# ORSI: WORKS ON PAPER

Catalogue 2021

Although Orsi is mostly known for her oil and acrylic paintings, she has never stopped working on paper; as a photographer, printmaker and draughts-person by early training. She enjoys the smaller scale, the intricacy of the style and the texture of the medium itself. Over the years she has built up a generous sized body of work in this media, but found it difficult to fit them within the collections that always seemed to be dominated by the bigger, bolder canvases, her previous exhibitions were built around. Not having been able to do justice to her works on paper, Orsi decided to dedicate a whole 2 weeks of centre-stage to her favourite pieces. As a consequence of the 'Lockdown', this show is not quite as she imagined, but still, she carefully curated a smaller selection to be displayed behind closed doors, and the show has now been hung. Enjoy!

**COMMISSIONS:** As a photographer, Orsi developed a great affinity for old photographs, especially those little black-and-white ones, one may acquire as an heirloom. The problem with them, that they are very difficult to duplicate, enlarge or display, due to their quality, size and age. Some of them are staged in a location that is not quite right, they may not be sharp enough to be enlarged, framed and hung, or they just don't work with the decor... Whatever the reason, she overcame it by using artistic talent (and some digital magic) to re-create an image that can become a focus-of-interest in anyone's home. There are some samples here - and on-line -, so if you are interested, please don't hesitate to get in touch:
